Product description

The PEGASO WORK is a safety helmet designed to protect the head, one of the most vulnerable areas exposed to impacts and falling objects on construction sites and in industrial environments. Lightweight, ventilated and comfortable, this personal protective equipment (PPE) is ideal for working at height and demanding professional applications.

Designed for construction, maintenance and industrial professionals, it combines durability with user comfort. Its ABS outer shell and adjustable retention system provide a secure and stable fit, even during extended periods of use.

Certified to EN 397 + A1:2012, the PEGASO WORK delivers reliable impact protection while integrating practical features focused on comfort, performance and versatility.

Enhanced Ventilation

The helmet features 8 mesh-covered ventilation openings that promote continuous airflow. This design helps reduce heat build-up and improves comfort throughout the working day.

Precise and Ergonomic Adjustment

The EASY TURN 3D system allows both vertical and horizontal adjustment for a customized fit. The rear adjustment wheel ensures quick and accurate helmet positioning.

Accessory Compatibility

The PEGASO WORK includes dedicated attachment points for a wide range of accessories, including face shields, earmuffs and headlamps, making it suitable for various working environments.

Comfort and Hygiene

Breathable internal padding combined with COOLMAX® fabric and Sanitized® treatment helps manage moisture and enhance wearer comfort. The padding is fully washable and replaceable, ensuring long-lasting hygiene.
